

Mitsubishi Electric Europe B.V.

Mitsubishi Electric Europe B.V. (MEU)
Environmental Policy (2018)

MEU recognizes that its business activities are intricately linked to the global environment and thus managing our impact on the environment is one of our top management priorities.

We aim to promote sustainable development at all levels of our operation through our highly efficient, innovative and resource saving products/technologies and environmentally conscious services. In this way, MEU endeavours to contribute to the improvement of the European society, to protect the environment and prevent pollution.

MEU encourages its employees to take part in environmental activities and thus aim to enhance its employees' environmental awareness. We, as responsible 'corporate citizens' are also actively pursuing open communication of our environmental activities and engage our stakeholders and European society in this process.

We are committed to abiding by the law and social norms as a minimum requirement, and furthermore strive to exceed all relevant regulatory requirements and voluntary agreements. In the coming years we will strive to further enhance our compliance, safety and quality aspects of our products and services.

MEU will aim to expand its environment related business in the coming years in order to improve consumers' energy efficiency during products' use phase, combat global warming, better utilise resources, create a low-carbon society, a recycling based society and respect biodiversity.

As our company motto "Changes for the Better" suggests, our ultimate objective and target is to contribute to a more prosperous lifestyle and improve the environment for present and future generations through a never-ending pursuit of quality and care for the environment.

This policy will be periodically reviewed and it is available to the public and interested parties upon request.

Signed: 

Mr. Yoji Saito

MEU President & CEO

Date: January 2018
